What is “Export Control”？

“Export Control” means the controlled transfer of technologies or exportation of goods and software in order to prevent transfers that can be potentially diverted to weapons of mass destruction or military use. In particular, machine tools are sensitive goods in security export control. Many developed countries have strict regulations on machine tools exports, based on international regime.
This webinar will provide you an overview of the regulations regarding security export control for Japanese machine tools and how to comply with them.
By attending this webinar, you will be able to acquire knowledge about the following.

- The need for export controls.
- The contents of export control for machine tools.
- What to do before and after receiving machine tools from Japan.
- What to do when problems arise.
